

Website Hosting Information

Contact: webhost@jeanegan.com

512 MB package (\$30/year —> this works out to be \$2.50/month) I created this plan for people who have a relatively simple website, don't need much space or bandwidth traffic needs and are looking to have a very stable web presence at a very reasonable cost. (And, if your needs grow, you can move up to the 1 GB plan, without breaking the bank!)

512 MB Web Space	Subdomains: Unlimited
6 GB Bandwidth Traffic	Frontpage extensions loaded
2 FTP Accounts (negotiable*)	cPanel access**
6 Email Accounts (negotiable*)	
1 SQL Database (negotiable*)	

1 GB package (\$60/year —> this works out to be \$5/month) This plan is perfect for most people. It offers enough space to allow for a pretty comprehensive site and allows a sufficient amount of bandwidth traffic.

1 GB Web Space	Subdomains: Unlimited
13 GB Bandwidth Traffic	Frontpage extensions loaded
2 FTP Accounts (negotiable*)	cPanel access**
12 Email Accounts (negotiable*)	
2 SQL Databases (negotiable*)	

2 GB package (\$120/year —> this works out to be \$10/month) This plan is for people who may need more space for a comprehensive site, use the ftp to transfer large files from workplace to home and back again or to share files with clientele, or simply have sites that are popular and demand more bandwidth traffic.

2 GB Web Space	Subdomains: Unlimited
26 GB Bandwidth Traffic	Frontpage extensions loaded
4 FTP Accounts (negotiable*)	cPanel access**
25 Email Accounts (negotiable*)	
4 SQL Databases (negotiable*)	

*negotiable = if you want or need more let me know. It won't be a problem for the same price. **The three web packages above come with the comprehensive cPanel software. Here's a link to a screen capture of cPanel, so you can see just how well you'll be able to control your website through it. <http://www.jeanegan.com/webhost/cPanel.jpg> (In particular, notice the statistics software under the heading "logs". This can be very helpful to see how well received your site is.)

Domain Parking (\$10 —> one time fee) This feature will allow you to have multiple domain names point to 1 website. Also, you can use this feature if you've purchased your web name, but don't have the time or intend to have more than 1 page of information for a little while. (I will allow for contact information on the page of information and email forwarding, to enable potential customers to be able to contact you.)

Domain Name Registration You are welcome to use any domain name registrar you choose. The registrar that I use is gkg.net. They offer competitive pricing, and a control panel to allow you to update your records as they may change. Although I prefer clients to register their own domain name, to make it easy on people who are not familiar with how or are not inclined to do this, for a \$3 to \$5 over cost, I can purchase the domain name for you. For instance, if you decide to have me purchase your name for 10 years, your total cost will be \$74.40 +\$5. Here's a snapshot of their current pricing (January 2008):

Domain Type	1-4 yrs	5-9 yrs	10 yrs
.com*	\$9.58	\$7.76	\$7.44
<i>add to the total years purchased</i>	<i>+\$3</i>	<i>+\$4</i>	<i>+\$5</i>

To keep billing simple, initial payment will be prorated to December 31 of the current year. Each new year will be billed from January 1 to December 31.
